

## Small Cableway 100 kg

### The ideal solution for short distances and small loads

The Wyssen small cableway is ideally suited for transporting baggage or building material to remotely situated mountain, club or holidays homes.

### Facts

- Maximum Cableway length: 100 m
- Load capacity: 100 kg > suitable for everyday use
- Carriage with loading bridge is very light: only 34 kg
- Drive: Small electric cable winch, operating voltage of 230 V
- Cable control directly on the winch and radio remote control included
- Optional supports available for convex terrain

#### Legend

- 1 Top (mountain) station with drive
- 2 Carriage with chain suspension
- 3 Loading bridge
- 4 Support with skyline cable saddle and guyline cables
- 5 Valley station
- 6 Skyline cable
- 7 Mainline cable

### Advantages

- Simple and uncomplicated construction
- Relatively simple installation
- Other loads can also be attached instead of the loading bridge
- Easy to operate
- Also suitable for temporary use (e.g. construction sites)

Transporting people on the small cableway is strictly prohibited!
